Drinking Water Systems

Reduction of sediment, taste, odour, chlorine and organics

Residential Systems

Removes sediments, organics, taste, odours and offers protection against water-borne pathogens and disease. Ideal for treating water drawn from tanks, creeks, rivers & spring-fed dams.

MODEL - WTDSC T

PUROTWIST COUNTER-TOP FILTER SYSTEM

Featuring quick-twist disposable cartridge

Ideal for apartments, units, holiday homes, boats, caravans, RV's. Complete with carbon filter for reduction of sediment, chlorine, chloramines and organic taste & odour. Sits on top of sink or bench-top.

Diverter valve is fitted to tap aerator, simply open diverter valve when filtered water is required. Comprises stylish slimline housing with white hygienic finish, chrome plated brass diverter valve, inlet elbow and long-reach faucet and soft non-kink white hygienic inlet tubing.

MODEL - WTDSUSDPT

PUROTWIST DUAL FILTER UNDERSINK SYSTEM

Featuring quick-twist disposable cartridges

Hard plumbed undersink filter system with sink-mount dispensing faucet. Complete with 5.0 micron sediment filter & GAC carbon filter for reduction of chlorine, chloramine and organic taste and odours.

Supplied with all fittings required for installation to standard 1/2" copper pipe - brass compression tee, inlet shut-off valve, pressure limiting valve, backflow prevention device. Includes full-flow long-reach faucet, quick-connect fittings & tubing.

MODEL - WTRO-US4000

PUROTWIST UNDERSINK REVERSE OSMOSIS

Featuring quick-twist disposable cartridges

Features 3 filters and 1 RO membrane. Reduces sediment, chlorine, chloramines, organic taste & odours with 96-98% total mineral reduction, including fluoride. Our most popular drinking system. Produces up to 190 litres of high quality water per day.

Installed under the sink. Treated water is stored in a pressurised storage tank & supplied under pressure to a dispensing faucet. The system automatically refills the storage tank & shuts-off when full. Complete packaged system includes pre & post carbon filters, RO membrane, storage tank, chrome plated bench-mounted faucet, pressure limiting valve, backflow prevention, shut-off valve, high pressure tubing & fittings.

MODEL - WTROPRF-RO

PREMIUM REVERSE OSMOSIS UNDERSINK SYSTEM

Featuring direct on-line water supply - no water storage tank required. Dual 430mm RO membranes and carbon pre-filter.

Reduces sediment, chlorine, chloramines, organic taste & odours with 95-98% total mineral reduction, including fluoride. A premium RO system incorporating the latest RO technology. Over 2000 litres per day production.

Supplies up to 2.0 litres per minute direct on-line to the dispensing faucet. Complete packaged system includes carbon filter, two (2) RO membranes, chrome plated goose bench-mounted faucet, pressure limiting valve, backflow prevention, shut-off valve, high pressure tubing & fittings.
