

Underground Electric Dewatering Fish Tanks

Overview

Portable Fish Tanks are used in underground mines as part of the water management process. Mine water is collected from sumps and wet areas by pumps and delivered to the fish tank.

Standard capacity options of 2,000L, 4,000L, 6,000L, 10,000L and 14,000 litre tanks are designed to minimise maintenance. The bottom shape of the fish tank allows a self-cleaning action that dramatically reduces the retention of solids.

Flameproof or IP Rated models are available with pump and motor configurations selected based on the application requirements.

Features Available

- Area lighting
- Gas monitoring
- Inlet flow control
- Hinged inlet screen for easy debris removal
- AODD backup pumps
- Removal POD for easy maintenance
